

Create And Configure IBM Cloud Service

Create IBM Watson IoT Platform And Device

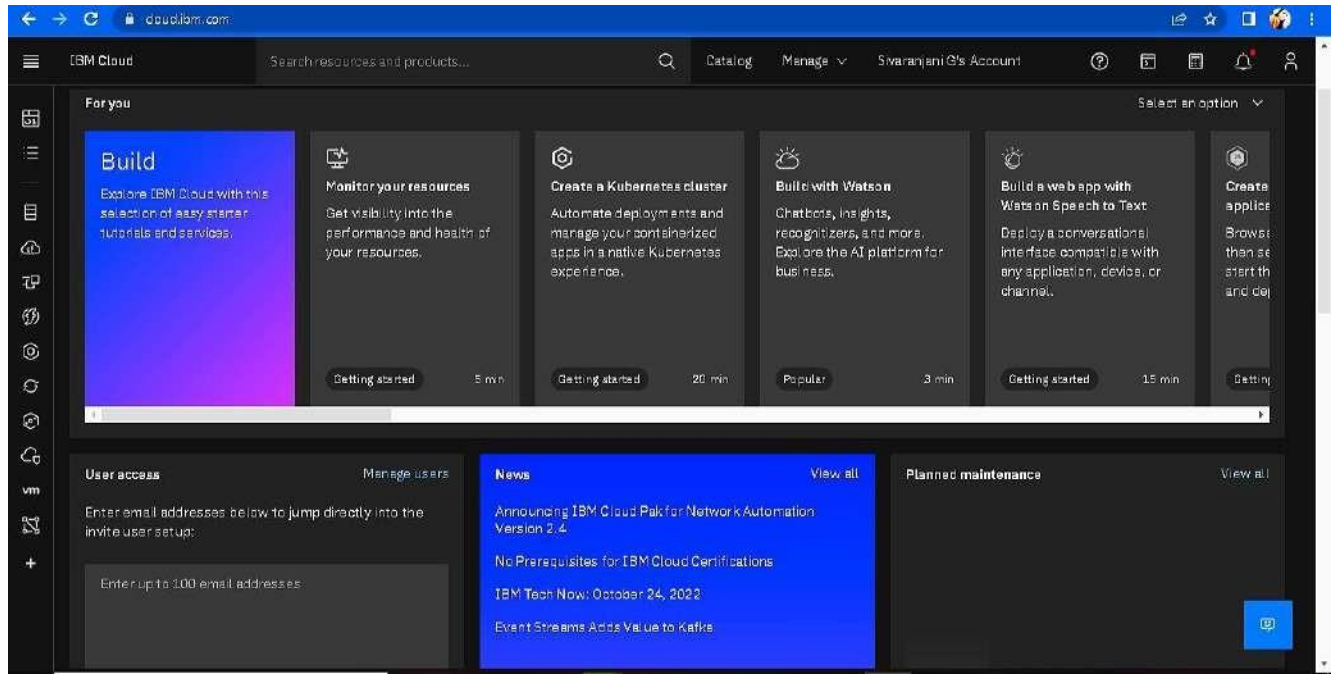

Team ID	PNT2022TMID38874
Project Name	IoT Based Safety Gadget For Child Safety Monitoring & Notification
Maximum Marks	4 Marks

STEPS

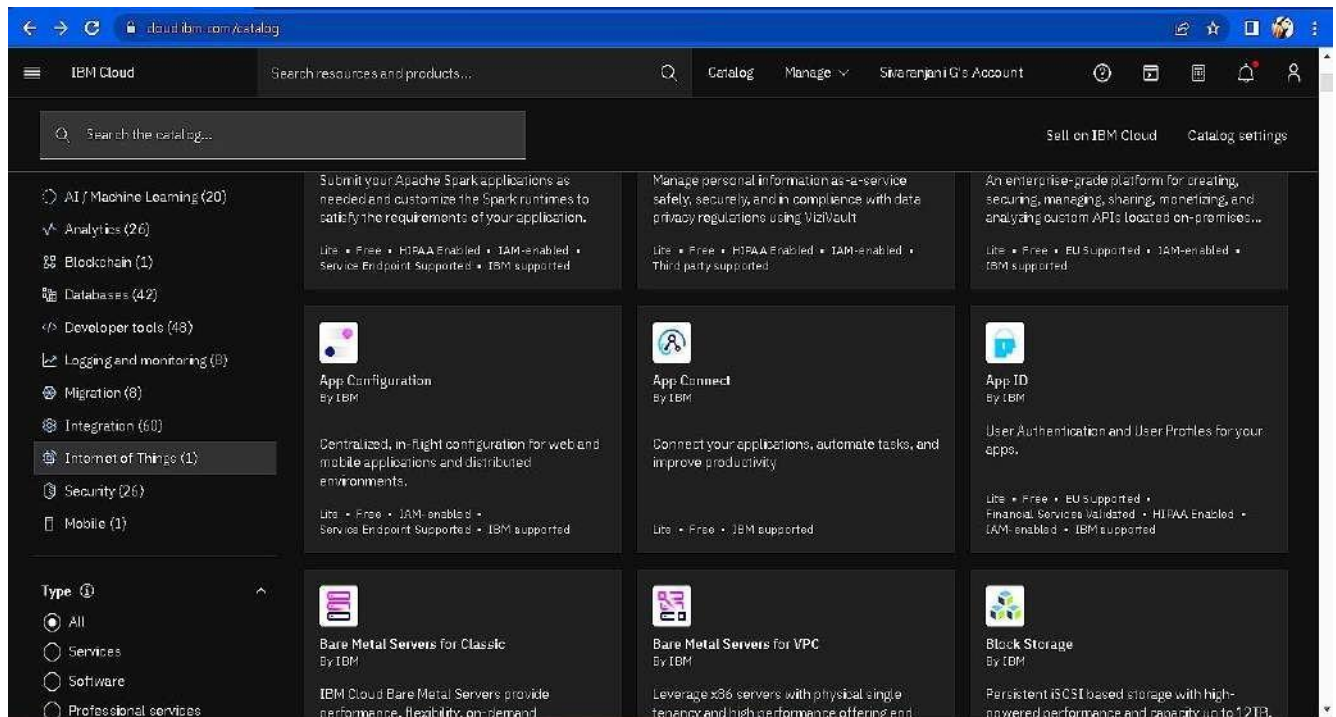

1. Firstly create an IBM cloud account with IBMid and password

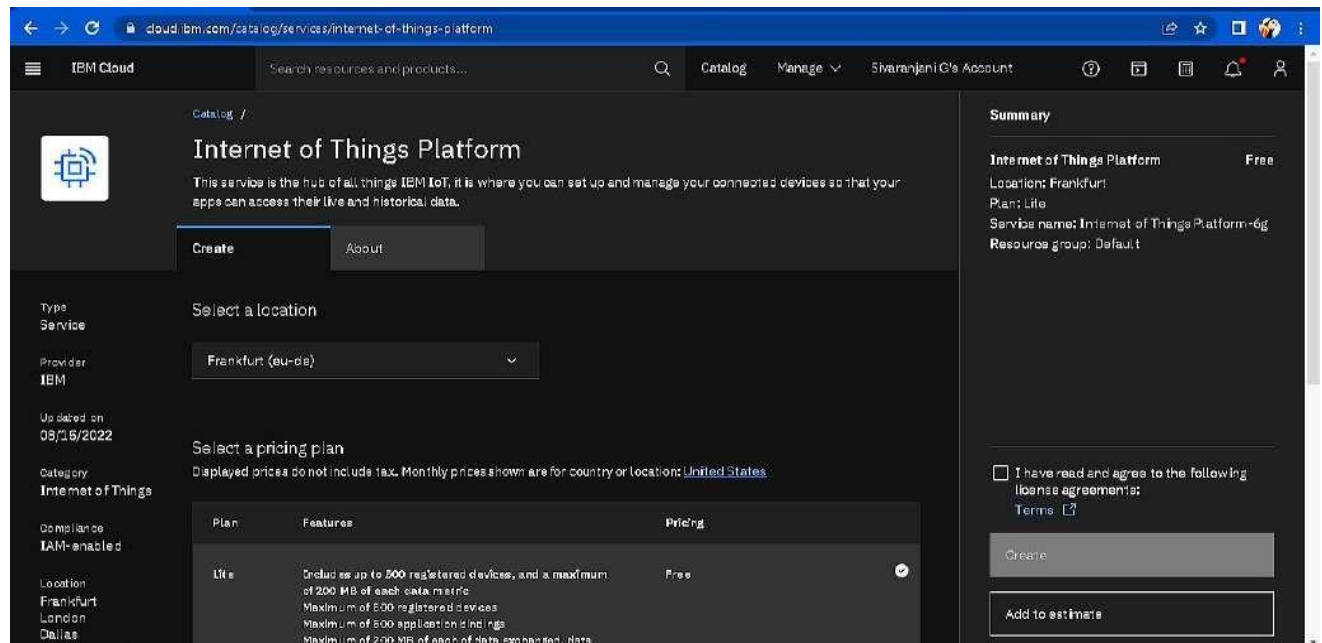

2. Home page of IBM cloud

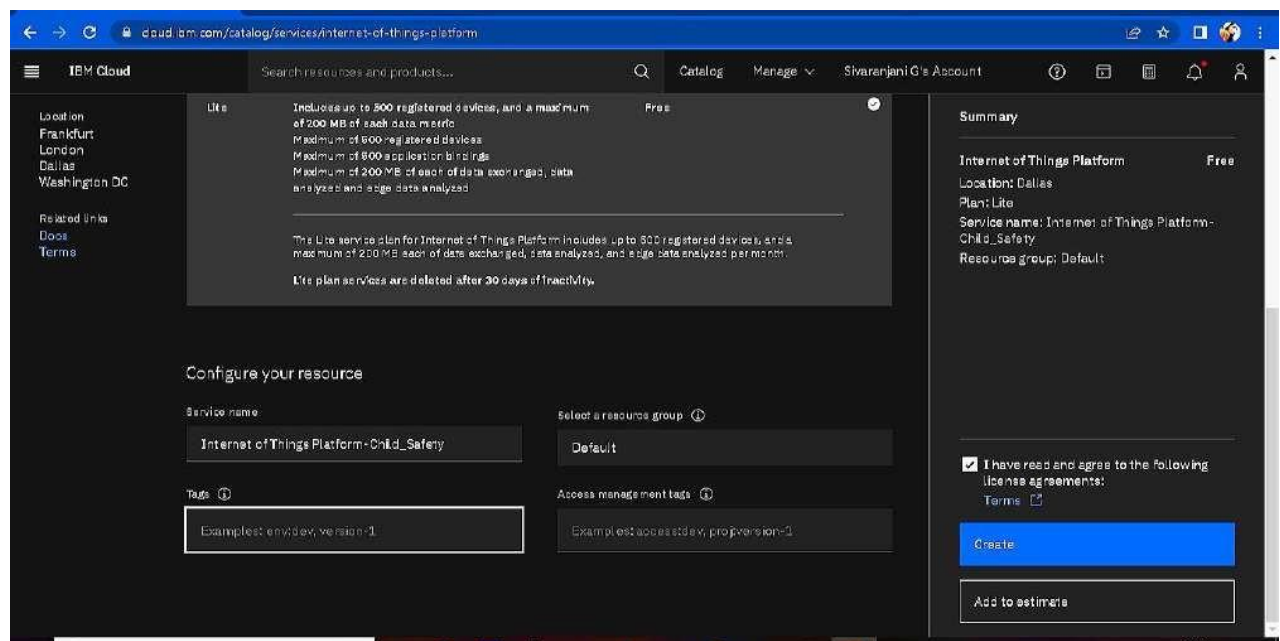

3. Click on the catalog on the top

4. Click on IoT in the category mentioned

5. If already a lite is present delete it else u can't create another

6. Enter the location and in the configure your resource type the service name and choose the plan, tick the agree with it agreements and then click on create

The screenshot shows the IBM Cloud 'Internet of Things Platform' configuration page. The 'Create' tab is active. The location is set to 'Frankfurt (eu-de)'. The pricing plan 'Life' is selected. The summary on the right shows the service is free. The 'I have read and agree to the following license agreements' checkbox is unchecked.

Internet of Things Platform

This service is the hub of all things IBM IoT. It is where you can set up and manage your connected devices so that your apps can access their live and historical data.

Create **About**

Type: Service

Provider: IBM

Updated on: 06/16/2022

Category: Internet of Things

Compliance: IAM-enabled

Location: Frankfurt, London, Dallas

Select a location

Frankfurt (eu-de)

Select a pricing plan

Displayed prices do not include tax. Monthly prices shown are for country or location: [United States](#)

Plan	Features	Pricing
Life	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric. Maximum of 500 registered devices. Maximum of 500 application bindings. Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed.	Free

Summary

Internet of Things Platform Free

Location: Frankfurt
Plan: Life
Service name: Internet of Things Platform-6g
Resource group: Default

☐ I have read and agree to the following license agreements:

7. Internet of Things Platform Child_safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other services)

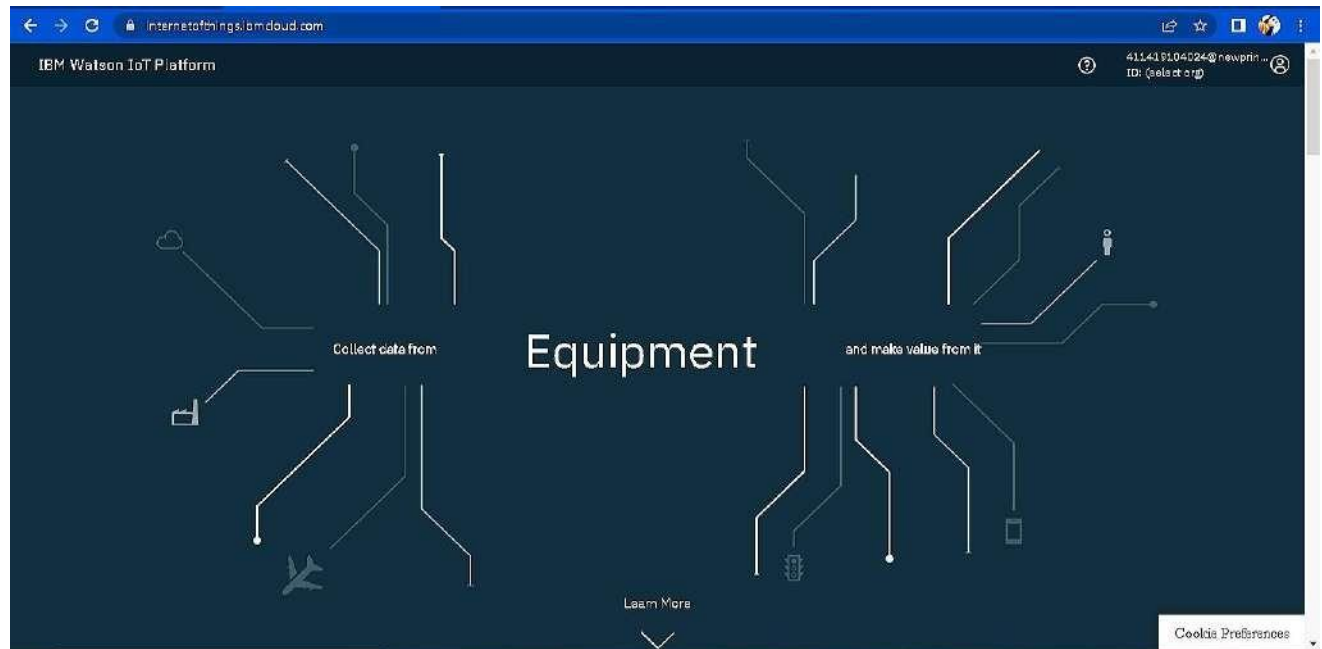

8. Clicking on the launch button in the manage tab, it will open to this

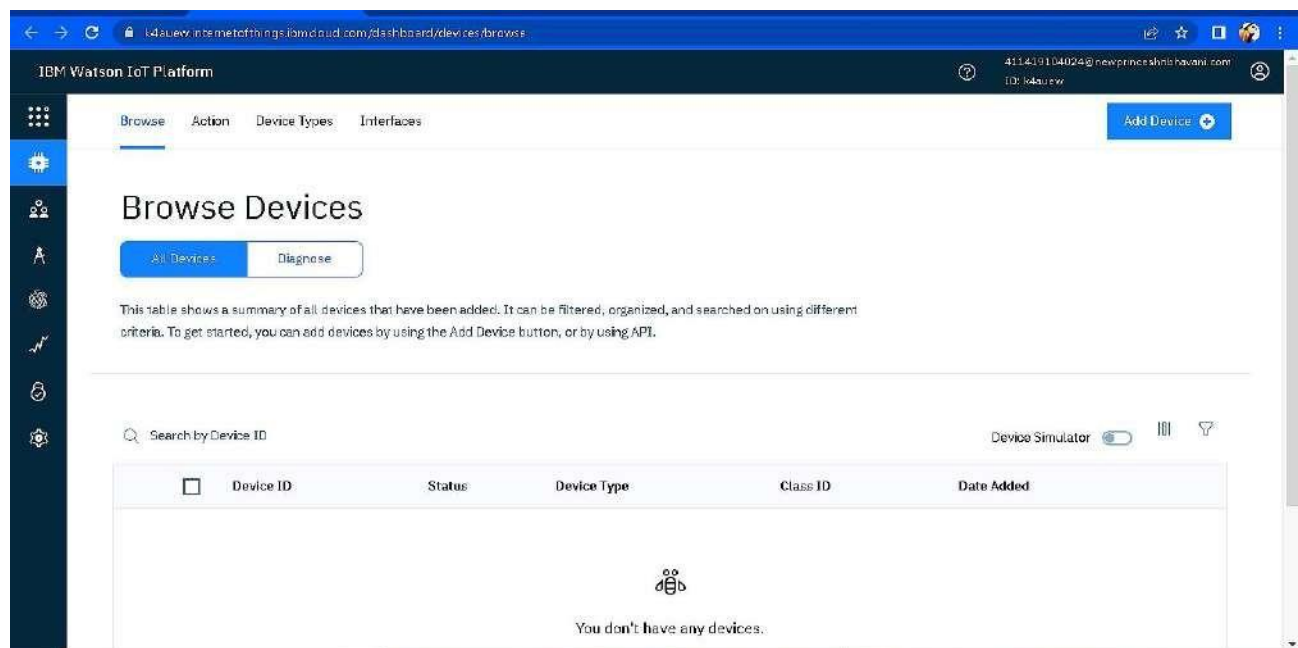

9. Enter the details to sign in to the Watson Cloud to create a device

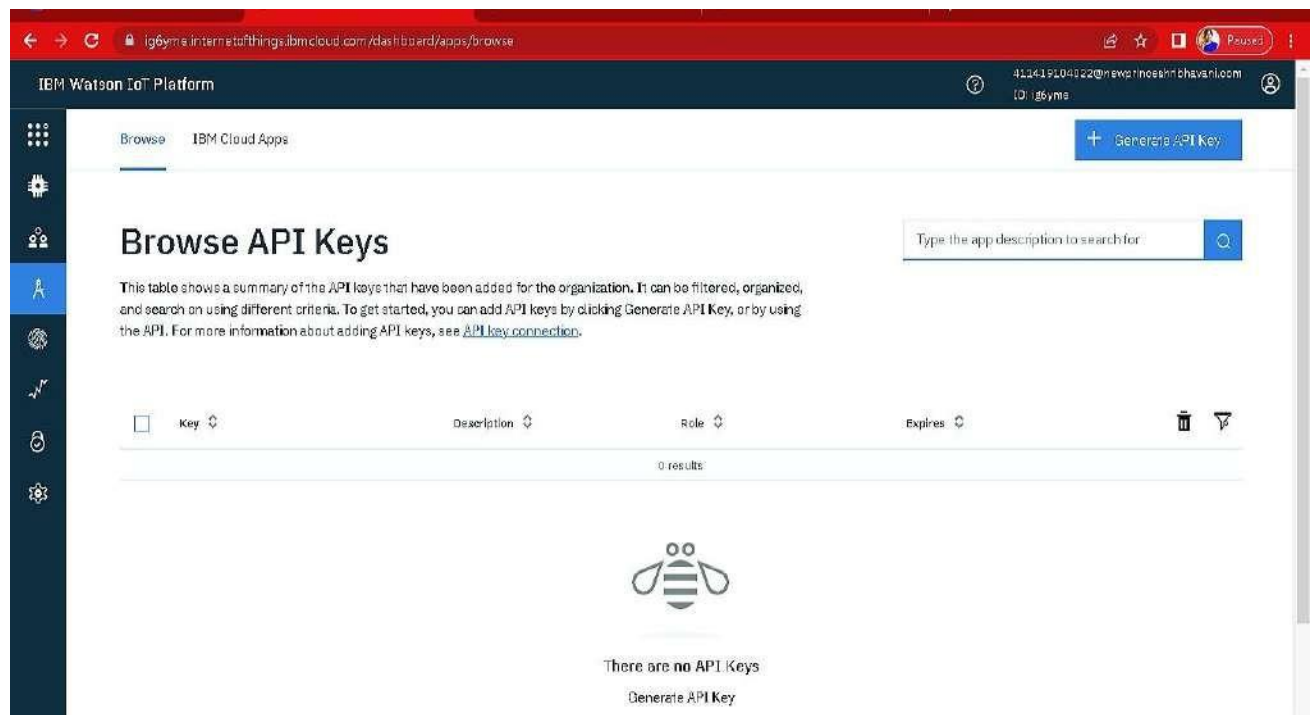

10. Once logged in the name will be displayed and it goes back to the first page

11. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices

13. This tab is used when you want to connect to some other platform and to integrate with other services.

14. Click on the device tab and click on the add device button, then give the device type and device id and click next

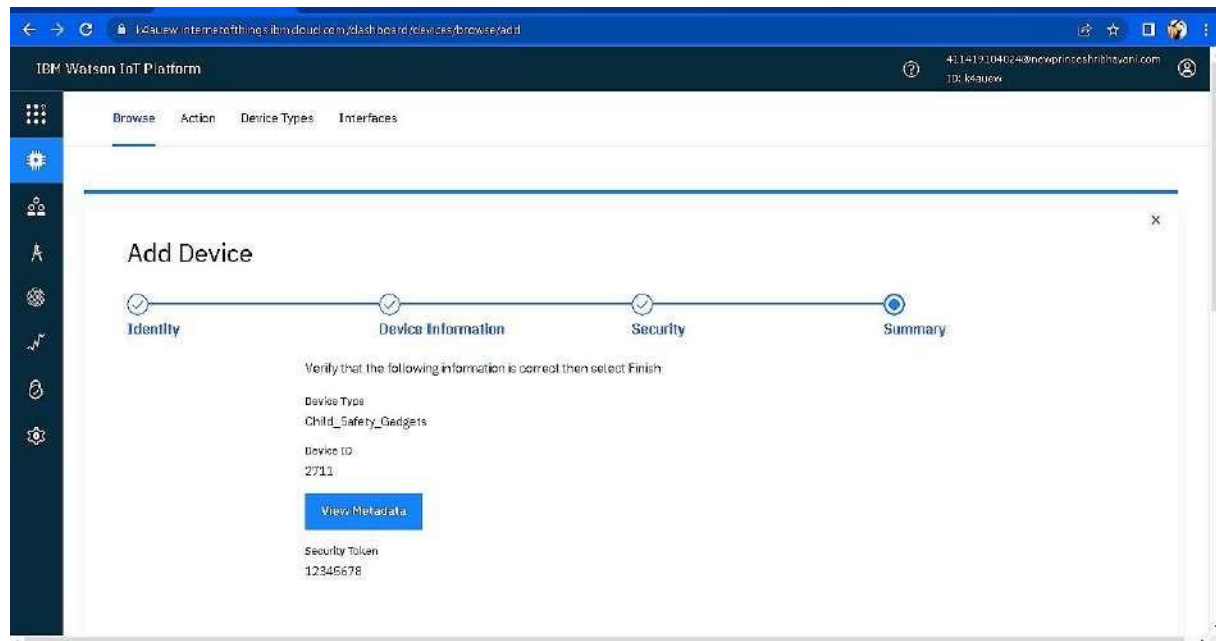

The screenshot shows the 'Add Device' page in the IBM Watson IoT Platform. The page has a dark blue header with the IBM Watson IoT Platform logo and a user profile. A sidebar on the left contains various icons. The main content area has a breadcrumb trail: 'Browse' > 'Action' > 'Device Types' > 'Interfaces'. Below this is a progress bar with four steps: 'Identity' (selected), 'Device Information', 'Security', and 'Summary'. The 'Identity' step contains a text box for 'Device Type' with the placeholder 'Select or create a device type...' and another text box for 'Device ID' with the placeholder 'Enter Device ID'. At the bottom right of the form are 'Cancel' and 'Next' buttons. Below the form is a section titled 'Browse Devices' with two buttons: 'All Devices' and 'Diagnose'.

15. This page to enter extra details and of the hardware

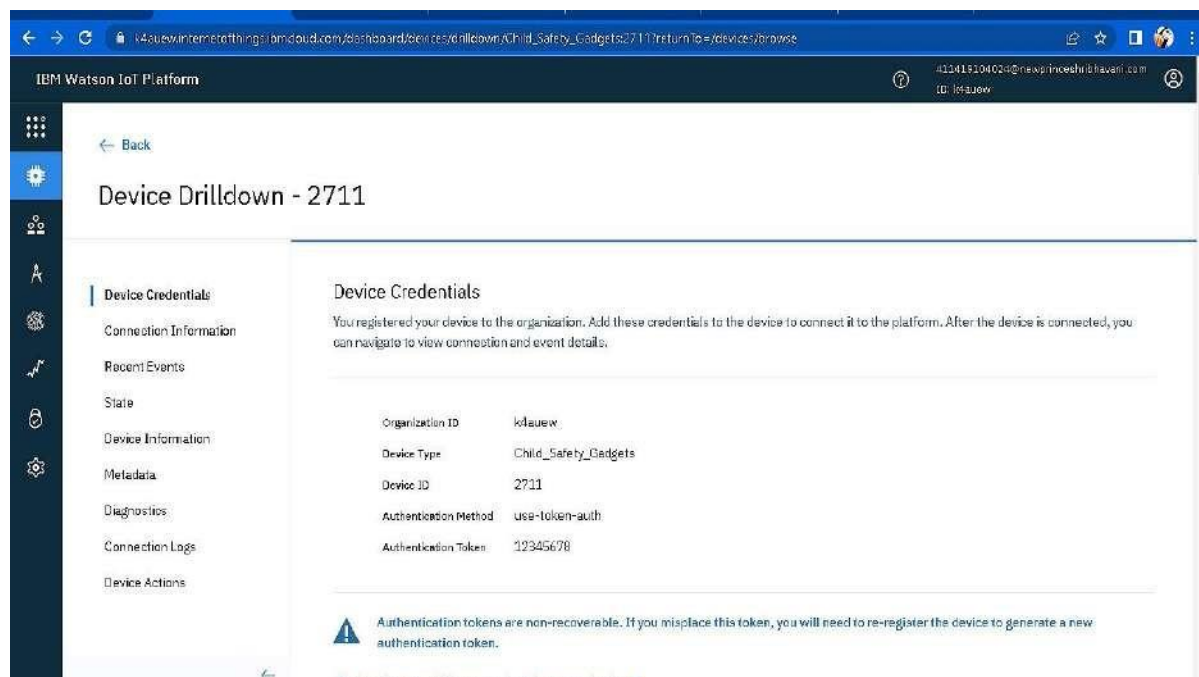

The screenshot shows the 'Add Device' page in the IBM Watson IoT Platform, specifically the 'Device Information' step. The progress bar at the top shows 'Identity' as a completed step (with a checkmark) and 'Device Information' as the current step (with a blue circle). The 'Security' and 'Summary' steps are also visible but not active. The main content area has a text box for 'Device Type' with the placeholder 'Select or create a device type...' and a text box for 'Device ID' with the placeholder 'Enter Device ID'. Below these is a section titled 'You can modify the default device information and enter more information about the device for identification purposes.' This section contains two columns of text boxes for 'Serial Number', 'Model', 'Description', 'Hardware Version', 'Manufacturer', 'Device Class', 'Firmware Version', and 'Descriptive Location'. Each text box has a placeholder 'Enter [field name]'. At the bottom left of this section is a button labeled 'Add Metadata' with a plus icon. At the bottom right of the form are 'Back' and 'Next' buttons.

16. Clicking next it goes to the security where we do authentication token id.

17. Clicking on next it goes to the summary of the device then click finish

18. The device credentials will be displayed with all the details

Safe the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

19. Clicking on the device tab we can now see the added device. Clicking on it will display the other details.

It has different tabs like Identity, Device Information, State and login.

IBM Watson IoT Platform

Browse Action Device Types Interfaces

Add Device +

Browse Devices

All Devices Diagnose

This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API.

Search by Device ID

Device Simulator

Device ID	Status	Device Type	Class ID	Date Added

Date Added Oct 30, 2022 9:00 PM

Added By 411419104024@newprinceshribhavani.com

Connection Status Disconnected

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

20..The Boards will display card for the project.

RESULT:

An IBM Watson cloud for IoT and a device is created
